TIMEX BOND

TIMEX FR Fire Retardant (FR) ACP

TIMEX BOND FR is composed of fire-resistant minerals (ATH and/ or MDH) filled core, sandwiched between two architectural aluminium skins of engineered alloys of 3003/5005 and Kynar 500 (PVDF) lacquered surface finish. Due to the self-extinguishing property of the FR core, it slows down the burning process, Reducing the intensity of fire, Thereby preventing its spread.

TIMEX BOND FR ACPs have very low non-toxic smoke emission that meets the building fire rationale for enhancing fire safety.

TIMEX BOND FR panels can be processed and fabricated as any other TIMEX BO ACPs. They are extremely Tough, Weather proof and above all, Do not actively contribute to combustion in case of fire, Thereby saving life and property and becoming the obvious choice .

Economical
EN13501-1
ClassBs1d0

90% FR Mineral Core
Non-Combustible
Suitable For High-Rise
